Joy in Technology

2021

Saison 2

Joy in Technology

Notre raison d'être :

Eco-concevoir des accessoires high tech utiles et design pensés pour le confort de tous.

L'éco-responsabilité a trouvé sa place dans tous nos process :

- Engagement des fournisseurs à nos côtés (cuir recyclé, encres végétales, innovations additifs Bio...)
- De nouveaux matériaux durables (fibres de blé ou de café, bouteilles recyclées...)
- Des emballages et packagings plus responsables (FSC certifié)
- Une réorganisation éco-friendly de la vie au bureau
- Acheminement des produits par bateau

Xoopar is the first high-tech gadget brand that carries sustainable practices into the company's heart with a long term sustainable road-map.

We apply sustainable practices throughout the whole process:

- Involvement of suppliers (recycled leather, vegetable inks...)
- New sustainable materials (wheat, coffee, recycled bottles)
- Responsible wrapping and packaging
- Green reorganization of the offices
- Mainly sea shipments

2021

«L'éco-responsabilité dans une entreprise est plus qu'une priorité aujourd'hui. Nous imaginons cela comme un voyage vers un monde où le gaspillage n'a plus sa place.»

«Sustainable business practices today are more than ever a priority. We see it not as a goal but as a journey to a zero-waste lifestyle.»
